Awareness Campaign for Water Borne Disease and Water Conservation

Venue: **Sikharia Para near main college campus**

Date: **24/02/2018**

Number of Participants:

Faculty Member-05

Eco club volunteer:-28

With the help of Eco club volunteers of our college organize an awareness campaign against water borne disease in Sikharia Para near main college campus. The area is basically a slum area and water borne diseases are very common in this area so our volunteers aware them about the preventive measures for water borne disease .Volunteers also describes them about the importance of use of pure water and conservation of water.

Vector Control Measures in College Campus

Venue: **Main college campus**

Date: **29/04/2018**

Number of Participants:

Faculty Member:-03

Eco club volunteer:-29

With the help of Eco club volunteers few vector control measures were taken in our college campus. Volunteers clean all the possible breeding grounds of mosquitoes by removing stagnant water from drains and also spray insecticides of plant origin. Volunteers also distribute leaflets containing vector borne disease and its control measures among students and general people surrounding our college campus. Participants also took the oath to do the same work in their own house to build a healthy community.

Plantation Programme

Venue: **Sanghati Chattrabas**

Date of programme: **15/07/2017**
